
Tropitile CAL - Color Guide

The design of the Tropitile CAL is best highlighted if you use one base color and another six colors for the details. I suggest to choose three shades of one color plus three shades of another color for these.

Example with the yarn kit Coral Reef (picture above):

The blanket has a dark blue base color and three shades of pink plus three shades of turquoise. To achieve a gradient effect with the colors they are composed as follows:

1. Light pink, color 263
2. Medium pink, color 408
3. Dark pink, color 409
4. Dark blue (base color), color 393
5. Light turquoise, color 402
6. Medium turquoise, color 385
7. Dark turquoise, color 253

In the pattern the color numbers (1-7) are specified in parenthesis after each row number.

Yarn kits for the Tropitile CAL is available from Favoritgarner.se.

You choose yourself how to compose the colors in your yarn kit.
